

Executive Leadership Opportunity for a Public Health Department located in Central Illinois

Position Focus

The Director of Environmental Health is responsible for public health and/or environmental quality aspects of water supplies, sewage treatment, water pollution, air pollution, noise pollution, solid wastes, swimming pools, recreational areas, subdivision control, drainage, vector control, ionizing and non ionizing radiation, food and milk sanitation, occupational health, housing, plumbing, hospitals and institutional care facilities, disaster emergencies, health and safety hazards and other special projects.

Organization

- Ford County Public Health Department (FCPHD) is located in Paxton, IL, a rural community 80 miles south of Chicago.
- FCPHD is a newly formed Public Health Department that offers environmental health, communicable disease, maternal-child-health (MCH) and senior and healthy families' services

Qualifications

Bachelor's degree or an advanced degree with a minimum of thirty semester hours or forty-five quarter hours in the basic physical, chemical, biological, environmental or sanitary sciences. Post graduate training in Public Health, Public Administration or one of the above fields is desirable. Position requires licensure as an Illinois Licensed Environmental Health Practitioner (LEHP).
